✓ Professional Summary

Full-stack developer with 6+ years building production platforms across the GCC and MENA. At ArabyAds in Dubai, I shipped React dashboards and Node.js/.NET services processing 10K+ campaign events monthly for GCC brands and influencers. Proficient in TypeScript, React, Angular 19, Next.js, and Node.js — from AI-powered SaaS to enterprise EdTech. Trilingual, Agile-minded, and focused on scalable architecture, performance, and end-to-end delivery.

📁 Work Experience

● Full-Stack Developer at Intedgroup

Apr 2025 – Present | Tunis, Tunisia

- Architected and deployed micro-services for student records, trainer assignments, and multi-campus application workflows, serving 5+ school entities with unified digital infrastructure.
- Engineered secure JWT authentication flows and role-based dashboards for 4 distinct user types, streamlining enrollment, scheduling, and administrative oversight across campuses.
- Collaborated with product owners in Agile sprint cycles to deliver scalable, maintainable features aligned with business-critical academic and administrative needs.
- Tech Stack: Angular 19 / Node.js / TypeScript / PrimeNG 19 / SASS / SCSS / Tailwind

● Full-Stack Developer at Memorality

Oct 2024 – Jan 2025 | Tunis, Tunisia

- Developed an AI-driven event management platform from scratch, leveraging OpenAI API to analyze user profiles and deliver personalized event recommendations, boosting engagement metrics.
- Integrated OpenAI APIs into the production recommendation engine, enhancing accuracy of profile-based event matching and improving overall platform engagement rates.
- Architected a scalable Next.js + Flask full-stack solution with MongoDB schemas for users, events, and recommendation history, ensuring smooth performance under growing traffic.
- Tech Stack: Next.js / Flask / TypeScript / OpenAI API / MongoDB / TailwindCSS

● Full-Stack Developer at Wantotrip

May 2024 – Sep 2024 | Tunis, Tunisia

- Led a complete UI/UX overhaul of the travel booking platform, redesigning navigation flows, trip filters, and multi-step reservation journeys across desktop and mobile viewports.
- Collaborated with .NET backend engineers to integrate booking APIs, delivering fully responsive features that improved user engagement and retention metrics.
- Refactored legacy Angular modules and optimized component rendering, resulting in faster page loads and a smoother user journey during trip browsing and reservations.
- Tech Stack: Angular / TypeScript / SASS / SCSS / MUI / .NET

● Full-Stack Developer at ArabyAds

Jul 2022 – Mar 2024 | Dubai

- Engineered React-based front-end dashboards enabling GCC clients and influencers to create, monitor, and optimize ad campaigns, processing 10K+ campaign events monthly.
- Developed Node.js and .NET backend services for campaign data ingestion, reporting, and performance analytics, improving system reliability and data integrity at scale.
- Redesigned UI flows and optimized component rendering, reducing dashboard load times by approximately 40% and significantly boosting client satisfaction.
- Tech Stack: ReactJS / Node.js / .NET / JavaScript / SASS / SCSS

● Full Stack JS Instructor at GOMYCODE

Feb 2022 – Jul 2022 | Tunis, Tunisia

- Delivered hands-on MERN stack instruction to cohorts of 30+ students, guiding them through live coding sessions, code reviews, and real-world application development.
- Mentored students on client-based capstone projects from requirements through deployment, ensuring practical full-stack development skills and production-ready portfolios.
- Designed course materials, coding exercises, and project briefs aligned with industry hiring standards to enhance learning outcomes and student employability.
- Tech Stack: ReactJS / Node.js / JavaScript / MongoDB / Express / TypeScript / SCSS / Bootstrap / Material UI

● Web Developer at Freelance

Dec 2021 – Mar 2022

- Managed end-to-end project lifecycle for 5+ WordPress and PrestaShop client websites, from discovery and scope definition through QA testing and successful launch.
- Collaborated with international clients to define project scope, manage timelines and budgets, and coordinate with development teams to ensure on-time, on-budget delivery.
- Conducted quality assurance testing and provided ongoing client support, maintaining high satisfaction levels across all delivered projects.
- Tech Stack: jQuery / Ajax / Smarty / PrestaShop / JavaScript / MySQL

● Web Developer at IT Open Sprite (ITOS)

Nov 2019 – Nov 2021 | Tunis, Tunisia

- Streamlined access to customer reference data across business units, implementing process improvements that enhanced operational efficiency and data availability.
- Simplified front-end interactions and data flows, improving user experience across enterprise web platforms serving internal and external stakeholders.
- Designed technical specifications for website evolutions and developed new application flows, ensuring alignment with business requirements and system architecture.
- Conducted unit and integration testing across PHP and Symfony applications, ensuring application reliability, robustness, and production-grade stability.
- Tech Stack: PHP / JavaScript / Ajax / Joomla / PrestaShop / CSS / MySQL / Smarty / jQuery / Symfony / WordPress / CodeIgniter / Zend

📦 Education

● Licence in Computer Systems Development (DSI) at Institut Supérieur des Études Technologiques de Kasserine (ISETK)

Jun 2014 | Kasserine, Tunisia

● Master's in Information Systems Engineering (ISE) at Université Internationale de Tunis (UIT)

2015–2017 | Tunis, Tunisia

🔄 Certifications

● Full-Stack Development (MERN Stack) at GOMYCODE

Sep 2021 – Feb 2022

MongoDB, Express.js, React.js, Node.js

★ Skills

Languages : JavaScript, HTML, CSS, TypeScript, Python, UML, NoSQL, Mongoose

Frameworks : Angular, ReactJS, Node.js, Next.js, Flask, Express

Databases : MySQL, MongoDB

Tools : Postman, Slack, Discord, Git, Agile/Scrum

Soft Skills : Teamwork, Problem Solving, Communication, Adaptability

<> Projects

Carzone Crawler

Jan 2025 – Dec 2025

- Built a production-ready Dockerized TypeScript data crawler with containerized pipelines for reproducible deployments.
- Designed scalable scraping workflow architecture using Node.js and TypeScript.
- Tech Stack: TypeScript / Docker / Node.js

Collaborative Blog Platform

Jan 2025 – Dec 2025

- Developed a multi-author blogging platform with a responsive SCSS design system and Strapi CMS integration.
- Implemented collaborative content creation workflows for multiple authors.
- Tech Stack: SCSS / JavaScript / Strapi CMS

Backend Evaluation System

Jan 2024 – Dec 2024

- Architected a C# .NET back-end evaluation system with structured REST API design for enterprise assessment workflows.
- Designed clean API layers and evaluation workflow data processing pipelines.
- Tech Stack: C# / .NET / REST APIs

Portfolio Website

Jan 2026 – Dec 2026

- Built a personal portfolio using Next.js 16 App Router with Framer Motion animations and serverless contact form via Resend API.
- Implemented Zod validation, SEO optimization, and deployed on Vercel with CI/CD workflow.
- Tech Stack: Next.js / TypeScript / Tailwind CSS / Framer Motion / Vercel

Languages
